

AI as Catalyst Workshop Participants

English bios in current website order

This PDF includes 16 speakers and organizers, with one profile per page for easier reading and sharing.

1. Pan Hui

Chair Professor

HKUST(GZ) / MC2 Lab

FREng (International Fellow of the Royal Academy of Engineering), IEEE Fellow, ACM Distinguished Scientist, Member of Academia Europaea, and Chair Professor of Computational Media and Arts at HKUST(GZ). His research focuses on ubiquitous computing, mobile computing, augmented/virtual reality, data science, social and mobile networks, and metaverse-related systems.

Participant 1 of 16

2. Lei Chen

Chair Professor

HKUST(GZ) / Information Hub

ACM Fellow, IEEE Fellow, Dean of Information Hub at The Hong Kong University of Science and Technology (Guangzhou), Director of HKUST Big Data Institute, and Chair Professor in the Thrust of Data Science and Analytics and the Thrust of Artificial Intelligence at HKUST (Guangzhou). His research interests include data-driven machine learning, crowd-sourcing-based data processing, uncertain and probabilistic databases, web information management, multimedia systems, knowledge graphs, blockchain, data privacy, and spatial-temporal data management.

Participant 2 of 16

3. Leo Anthony Celi

Senior Research Scientist & Associate Professor

MIT / Harvard

Senior Research Scientist at Massachusetts Institute of Technology, Clinical Research Director of the MIT Laboratory for Computational Physiology, Co-Director of MIT Sana, Staff Physician in the Division of Pulmonary, Critical Care and Sleep Medicine at Beth Israel Deaconess Medical Center, and Part-time Associate Professor of Medicine at Harvard Medical School. His work focuses on using data science and AI to improve critical care, with particular emphasis on open clinical data and reducing bias in healthcare systems.

Participant 3 of 16

4. Mornin Feng

Associate Professor

National University of Singapore

Associate Professor at the National University of Singapore (Saw Swee Hock School of Public Health), Director of the AI for Public Health (AI4PH) Programme, Domain Lead for Biostatistics, Modelling, AI and Data Analytics (B.MAD), Associate Professor (Joint) at the Yong Loo Lin School of Medicine, Biomedical Engineering Department, and Institute of Data Science, and Chair of the Singapore Chapter of Observational Health Data Sciences and Informatics (OHDSI). His research focuses on healthcare AI, machine learning for clinical data, and data-driven decision-making, with applications in medical imaging, treatment optimization, and clinical NLP.

Participant 4 of 16

5. Calvin Kalun Or

Associate Professor

The University of Hong Kong

Associate Professor and Assistant Head of Department at the The University of Hong Kong (Department of Data and Systems Engineering). His research focuses on human factors and ergonomics, human-computer interaction, and healthcare informatics, particularly the design, implementation, and evaluation of health information technologies to improve patient safety, system performance, and quality of care.

Participant 5 of 16

6. Lowell Ling

Associate Professor

The Chinese University of Hong Kong

Associate Professor in the Department of Anaesthesia and Intensive Care at the The Chinese University of Hong Kong, and Assistant Professor in the Intensive Care Unit at Prince of Wales Hospital. His research focuses on sepsis, organ dysfunction, and critical care, particularly the epidemiology of sepsis in Hong Kong and its genomic mechanisms.

Participant 6 of 16

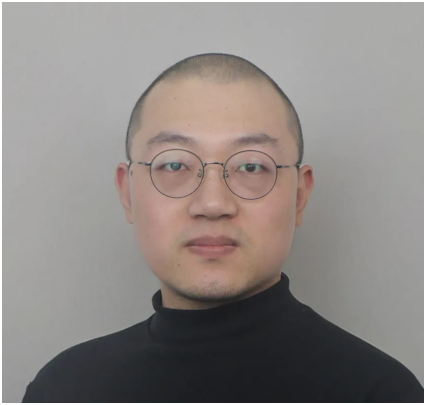

7. Xianglilan Zhang

Assistant Professor

The Chinese University of Hong Kong

Assistant Professor at the Faculty of Medicine, The Chinese University of Hong Kong. Her research focuses on applying artificial intelligence and machine learning to clinical diagnosis, disease surveillance, and treatment decision support, with applications in precision medicine and critical care.

Participant 7 of 16

8. Qiushi Zhou

Assistant Professor

HKUST(GZ)

Assistant Professor at the Hong Kong University of Science and Technology (Guangzhou), affiliated with the Thrust of Computational Media and Arts and the Thrust of Internet of Things. His research focuses on Human-Computer Interaction and Extended Reality, particularly novel interaction techniques integrating XR, AI, and IoT.

Participant 8 of 16

9. Xin Tong

Assistant Professor

HKUST(GZ)

Assistant Professor at Thrusts of Computational Media and Arts (CMA), Hong Kong University of Science and Technology (Guangzhou). She is working on human-computer interaction and human-AI collaboration, with a focus on healthcare, wellbeing, and accessibility using technologies such as VR/AR and generative AI.

Participant 9 of 16

10. Tengjia Zuo

Assistant Professor

HKUST(GZ)

Assistant Professor at Computational Media and Arts, Hong Kong University of Science and Technology (Guangzhou). Her research focuses on mixed reality, serious games, and human-computer interaction, particularly game-based learning and player experience design.

Participant 10 of 16

11. Hyunjung Gloria Kwak

Assistant Professor

Emory University

Assistant Professor at Emory University's School of Nursing. Her research focuses on applying artificial intelligence and machine learning to improve clinical decision-making, with an emphasis on advancing equity and reducing health disparities in healthcare.

Participant 11 of 16

12. James Yiming Zhu

PhD Student

HKUST(GZ) / MC2 Lab

Ph.D. candidate at the Hong Kong University of Science and Technology, affiliated with the MC² Lab. His research interests lie in social computing, data science, and natural language processing.

Participant 12 of 16

13. Yulin Yao

PhD Student

HKUST(GZ) / MC2 Lab

Yulin Yao is a PhD student in Computational Media and Arts at The Hong Kong University of Science and Technology (Guangzhou) and a digital visual artist. Her work operates at the intersection of immersive storytelling, VR and HCI. Grounded in spatial design and exhibition practice across Europe and China, she creates immersive digital environments exploring technology's impact on memory, emotion, and culture. Her practice bridges computational media and visual art, treating space itself as a medium for psychological inquiry and immersive world-building.

Participant 13 of 16

14. Boen Liu

Research Assistant

HKUST(GZ) / MC2 Lab

Research Assistant at MC² Lab, The Hong Kong University of Science and Technology (Guangzhou), and a student at Duke Kunshan University. His research focuses on social computing, graph learning and social network analysis.

Participant 14 of 16

15. Ruoshan Bianca Yang

AI Researcher

HKUST(GZ) / MC2 Lab

Bianca is an AI researcher at the Hong Kong University of Science and Technology (Guangzhou), affiliated with the Computational Media & Arts (CMA) Thrust. Her work sits at the intersection of Multimodal AI, Learning-centered XR Design, and Intangible Cultural Heritage. As a co-organizer of AI as a Catalyst GBA, Bianca bridges MIT's global network with the GBA's unique multilingual, multi-system healthcare landscape - turning critical research into local action through an interdisciplinary approach spanning science, art, and the humanities.

Participant 15 of 16

16. Dongyijie Primo Pan

MPhil Student

HKUST(GZ) / MC2 Lab

Primo's research explores how established psychotherapeutic approaches, especially cognitive behavioral therapy, can be translated into the language of human-computer interaction. He has contributed to projects including Lingolift and Virtual AI-SP, with work accepted at venues such as CHI and recognized by the China Computer Federation and the Tencent Light Foundation. In his future doctoral research, he aims to combine AI and XR with emerging lifestyle intervention methods to create new possibilities for chronic disease management.
